

ATTENTION: STUDENTS AND FACULTY

Due to lack of funding, the Federal government is no longer funding the year round financial aid which means there will be no more summer financial aid unless under certain circumstances. Some examples to receive financial aid for the summer semester are if the student did not register full time for fall or spring semesters then there might be some eligibility for the summer semester or if a student did not attend at all for either the fall or spring semesters then the student will have some eligibility for the summer semester.

If the student attended full time fall and has registered for full time for the spring semester, the student will not qualify for any financial aid for the summer semester.

Please contact me if you have any questions concerning this.
